# Please enter your comments in the following way
#
#"obsolete-command1"
#"obsolete-command2"
#       your comments about why this command is obsolete
#       and how users should deal with it
#       the above two commands will share the same comments
#       you put here.
#

"cmdGetLastError"
"cmdGetLastErrorMesg"
"cmdHelpLastErrors"
        (ERROR) Obsolete Command.
        The reason is

"cmdAttachWindowNumberOnForm"
        (ERROR) Obsolete Command.
        The reason is

"cmdSetEnterFuncNestOption"
"cmdSetFormNestOption"
        (ERROR) Obsolete Command.
        All the command nesting are now controlled automatically.

"dbCreateState"
"dbCreateStateCommand"
"dbCreateStateCommandClass"
"dbCreateStateTransition"
"dbSetStateCommandStatus"
        (ERROR) Obsolete Command.
        All state related records and commands are no longer
        supported.

"dbFreeHierToLocalNameHash"
"dbFreeLocalToHierNameHash"
"dbInitHierToLocalNameHash"
"dbInitLocalToHierNameHash"
"dbConvertHierDelimiter"
"dbConvertHierCellInstToLocal"
"dbConvertHierNetToLocal"
"dbConvertLocalCellInstToHier"
"dbConvertLocalNetToHier"
"dbCellHasCellInstMap"
"dbCellHasNetMap"
        (ERROR) Obsolete Command.
        We now use user's hierarchical names consistently throughout
        the whole session.

"setDisplayLimitLines"
"getDisplayLimitLines"
        (ERROR) Obsolete Command.
        The reason is

"setDisplayMode"
"getDisplayMode"
        (ERROR) Obsolete Command.
        The reason is

```

"hiAddPlotBoxText"
"hiAddPlotCircle"
"hiAddPlotLine"
"hiAddPlotPoint"
"hiAddPlotPolygon"
"hiAddPlotRectangle"
"hiAddPlotSegment"
"hiAddPlotText"
 (ERROR) Obsolete Command.
 These commands were for internal use only.
 They have been replaced by a new set of commands.

"hiFitPlotWindow"
"hiClosePlotWindow"
"hiFitPlusPlotWindow"
"hiGetCurrentPlotWindow"
"hiPanPlotWindow"
"hiPlotWinToPostScript"
"hiRedrawPlotWindow"
"hiSetCurrentPlotWindow"
"hiSetPlotDrawAttr"
"hiTestPlotWindow"
"hiZoomInPlotWindow"
"hiZoomOut2PlotWindow"
 (ERROR) Obsolete Command.
 The plot window is now controlled with
 the same commands as the cell windows.

"hiGetCurrentTextWindow"
"hiCmdSetWindowTextFile"
"hiCmdTextLoad"
"hiCmdTextSaveAs"
"hiGetWindowTextFile"
"hiMenuSetWindowTextFile"
"hiMenuTextLoad"
"hiSaveWindowTextFile"
"hiSetCurrentTextWindow"
"hiSetWindowTextFile"
 (ERROR) Obsolete Command.
 The text window is now controlled with
 a new set of commands.

"sapCellInstPinAccessExtractor"
"sapCellInstPinAccessExtractorBySide"
"sapPinAccessExtractor"
"sapPinAccessExtractorBySide"
"sapSetLibSideProperty"
 (ERROR) Obsolete Command.
 These were obsolete long time ago.

"uiDisplayDefaultFixedMenu"
"uiNextFixedMenuPage"
"uiPrevFixedMenuPage"
 (ERROR) Obsolete Command.
 The fixed menu is no longer supported.

"uiDeleteBannerMenu"

"uiTest2DForm"
 (ERROR) Obsolete Command.
 Due to the new design of GUI architecture, this scheme command
 is obsolete and not valid for interactive form control.

(ERROR) Obsolete Command.
 The reason is

"setText"
 (ERROR) Obsolete Command.
 The reason is

"aprElectromigration"
 (ERROR) Obsolete Command.
 The reason is

"aprSPEFOut"
 (ERROR) Obsolete Command.
 The reason is

"aprStarExCritical"
 "aprStarExSmart"
 "aprStarSDF"
 "aprStarSetup"
 (ERROR) Obsolete Command.
 The reason is

"pprAddPath"
 "pprAddVia"
 "pprAreaRoute"
 "pprDeleteGuidance"
 "pprFreeDesc"
 "pprInitDesc"
 (ERROR) Obsolete Command.

"axConvertDesignData"
 "axConvertDesignDataInLib"
 "dbDowngradeLib"
 "dbUpgradeLib"
 "dbUpgradeWireType"
 (ERROR) Obsolete Command.
 These are for converting data among old products.
 They are no longer needed.

"axgNewPlanner"
 "axgUseNewPlanner"
 (ERROR) Obsolete Command.
 The 'New' planner is now the default planner.

"geShowLibCat"
 "cmShowLibCat"
 "hiBrowse"
 "geBrowseOpenCell"
 "geBrowseOpenLib"
 (ERROR) Obsolete Command.
 A more flexible and powerful library/cell browse mechanism
 is provided for interactive cell open command.

(ERROR) Obsolete Command.

The reason is

"geSetDisplayCtrl"

(ERROR) Obsolete Command.
The reason is

"geGlobalOption"

(ERROR) Obsolete Command.
Some of the controls in no longer valid and
some controls are now in the 'geWindowOption'.

"geZoomInBy4"

"geZoomOut"

(ERROR) Obsolete Command.
These commands are rarely used and can be replaced
by other viewing commands easily.

"hiSetPrimeColor"

(ERROR) Obsolete Command.
The reason is

"hiSetRubberMode"

(ERROR) Obsolete Command.
The reason is

"geAddNet"

(ERROR) Obsolete Command.
The reason is

"geAddPolyPin"

(ERROR) Obsolete Command.
The reason is

"hiExecuteCommand"

(ERROR) Obsolete Command.
The reason is

"hiRegFormOKCB"

(ERROR) Obsolete Command.
The reason is

"hiSetCMDMenuString"

(ERROR) Obsolete Command.
The reason is

"hiSetColorRGBbyInd"

(ERROR) Obsolete Command.
The reason is

"formDisplay"

(ERROR) Obsolete Command.
The reason is

"hiWaitAnyKey"

(ERROR) Obsolete Command.
The reason is

"hiLowerWindow"

```
"hiRaiseWindow"
"hiCloseWindow"
    (ERROR) Obsolete Command.
    These commands are no longer supported.
    Suggestion: please use
    'textWindow (getLastTextWindow) "Close"'

"hiMoveWindow"
"hiResizeWindow"
    (ERROR) Obsolete Command.
    These has been replaced by 'configureWindow',

"hiDeiconifyWindow"
"hiIconifyWindow"
    (ERROR) Obsolete Command.
    These has been replaced by
    'iconifyWindow', and 'deiconifyWindow'.

"axgPickWireTrack"
    (ERROR) Obsolete Command.
    The reason is

"aprDisplayPlaceMap"
    (ERROR) Obsolete Command.
    replaced by axgDisplayPLCongestionMap

"dbSetErrorClassColor"
"dbSetErrorClassPattern"
    (ERROR) Obsolete Command.
    The reason is

"geCloseCell"
    (ERROR) Obsolete Command.
    the new command is
        geCloseWindow
        formOK "Close Window"

"chpSetWireDir"
    (ERROR) Obsolete Command.
    The reason is

"gaDeleteUnusedWireMaster"
"axDeleteUnusedWireMaster"
    (ERROR) Obsolete Command.
    The wire masters are now handled in a more flexible way
    and there is no need to delete unused wire masters.

"scGC"
"scSetGCRate"
"scSummary"
"setRDLog"
"resetRDLog"
"uplTest"
"setMemoryTraceDepth"
"startMemoryTrace"
"stopMemoryTrace"
"dumpMemoryTrace"
"debVarArg"
```

"geSetArcSysRDctrl"

(ERROR) Obsolete Command.
These were for internal use only.
They have been removed.

"dbSetObjectField"

(ERROR) Obsolete Command.

"geGridOpton"

(WARNING) Field Changed.
Bind keys are not defined in this form anymore.
There are direct commands to define them.

"axgPlaceOptions"

(WARNING) Field Changed.
Macro Padding: was eliminated and replaced by a separate command under "Preplace". which creates real placement blockages for further editing.

regionMode: New one automatically determine "All Cells" versus "Free-Style". No sub-options are needed any more.

"Hardness" is replaced by "Adjust Constraint by x%". The definition is different. Old hardness option lifts constraints at certain point during placement. The Adjust Constraint option is used to enlarge or tighten constraint. Constraint cannot be lifted. The reason of change is that the old approach creates problems during Search & Refine also the area placement.

"Exclusive" option is now replaced by individually specified exclusiveness during creation of a region. In other words, the new region constraint allow users to specify region exclusiveness on individual base.

"axgAreaPlace"

(WARNING) Field Changed.
Two fields are obsolete, "IO Refinement" and "Congestion:".
IO Refinement: is available now only in full design placement to simplify form. It is less effective in area-based placement than full design placement.
Congestion: It is now controlled in Place Common Options form "Congestion Driven"

"axgAddFillerCell"

(WARNING) Field Changed.
One field is obsolete, "respect macro padding".
It now only respect real placement blockages. Use a separate command to create placement blockages.

"geWindowOption"

(WARNING) Field Changed.
the field "array" is no longer supported.
if you issue the following command -
 setToggleField "Window Options" "Selectable Object" "array" 0
then, you will see the message below
 Cannot find field (Selectable Object,array)

"geDefineBindKey"

(ERROR) Command Obsolete

Please use 'defineBindKey' instead. You can use 'listBindKey'
to show all the current bind keys and the syntax.

"signal-interrupt-error"

(ERROR) Command Obsolete
