coreTools Documentation Overview

This chapter contains the following sections:

- [“coreTools Document List”](#) on page 6
- [“Synopsys Common Licensing \(SCL\) Information”](#) on page 8
- [“Synopsys Statement on Inclusivity and Diversity”](#) on page 9
- [“Getting Help”](#) on page 10

1.1 coreTools Document List

The coreTools documentation set includes the following:

1. General Documents
- coreTools Documentation Overview*
- coreTools Release Notes*
- coreConsultant User Guide*
- coreAssembler User Guide*
2. Building coreKits
- coreBuilder User Guide*
3. Command Reference Document
- coreTools Command Reference*
4. Tutorials
- Using Synopsys Library IP in coreAssembler*
- coreBuilder Tutorial*

For help with automating coreTools using Synopsys Tcl, the following document provides examples and information about TCL collections, types, and so on (requires SolvNetPlus log in):

Using Tcl with Synopsys Tools

Table 1-1 coreTools Document List

General Documents	Description
<i>coreTools Documentation Overview</i>	This document.
<i>coreTools Release Notes</i>	Lists new features in the release, hardware and software system requirements, installation information, tool invocation information, problems fixed in the release, and known problems and limitations.
<i>coreConsultant User Guide</i>	Describes how coreConsultant works with cores that core developers have packaged for reuse, using the coreBuilder application. Explains how to integrate and synthesize cores in chip-level applications.
<i>coreAssembler User Guide</i>	Describes the core integration tool, similar to coreConsultant but working at the subsystem (an interconnected set of cores) level. Explains how to connect a group of cores with common interfaces together to form a subsystem, then synthesize the subsystem.
<i>Using Synopsys Library IP in coreAssembler</i>	Contains a number of tutorials that take you through the steps of assembling, simulating and synthesizing single-layer and multi-layer Synopsys AMBA subsystems.

Table 1-1 coreTools Document List (continued)

General Documents	Description
<i>coreBuilder User Guide</i>	Explains how to build coreKits using a guided flow of activities. These activities define configuration and apply attributes that describe the design’s internal structure and its expected target environment.
<i>coreBuilder Tutorial</i>	Contains a tutorials that takes you through the steps of specifying and building a coreKit for your IP using coreBuilder.
<i>coreTools Command Reference</i>	A compilation of all coreTools “man” pages, this PDF document provides consolidated command reference information. For easy access, the contents are indexed in the coreTools full-text search index.

1.2 Synopsys Common Licensing (SCL) Information

Synopsys common licensing (SCL) software is delivered separately from the tools that use this licensing software. You can find information about SCL at the following URL:

<https://www.synopsys.com/support/licensing-installation-computeplatforms/licensing.html>

1.3 Synopsys Statement on Inclusivity and Diversity

Synopsys is committed to creating an inclusive environment where every employee, customer, and partner feels welcomed. We are reviewing and removing exclusionary language from our products and supporting customer-facing collateral. Our effort also includes internal initiatives to remove biased language from our engineering and working environment, including terms that are embedded in our software and IPs. At the same time, we are working to ensure that our web content and software applications are usable to people of varying abilities. You may still find examples of non-inclusive language in our software or documentation as our IPs implement industry-standard specifications that are currently under review to remove exclusionary language.

1.4 Getting Help

If you have a question about using Synopsys products, please consult product documentation that is installed on your network. You can also access documentation for Synopsys products on the Web:

- Datasheets for individual Synopsys IP components, located using “Search for IP”:
<https://www.synopsys.com/designware-ip.html>
- License Information -- Synopsys Common Licensing Quickstart:
<https://www.synopsys.com/support/licensing-installation-computeplatforms/licensing.html>

You can obtain product support in the following ways:

- Go to SolvNetPlus to submit support requests and access documentation and software downloads:
<https://solvnetplus.synopsys.com/>
- Send an e-mail message to support_center@synopsys.com.
- Global Support Centers -- contact information and hours of operation:
<https://www.synopsys.com/support/global-support-centers.html>
